

## The Enabler Group

**'Enabling vision, connecting people'**

Any successful organization in the world today has one crucial element at the root of its growth; vision. Through the evolution of technology, these organizations have come to rely on various applications to turn their visions into reality, some with more success than others.

### The Vision

The Enabler Group has a simple vision, to turn your visions into reality through enabling people to utilize technology to its full potential.

### Origin

The Enabler Group is a South African based company, founded in 2002 by Pieter van der Merwe, the original developer of BizTalk Utilities Adapters.

The main objective behind the formation of the company was based on a need identified within the market to provide BizTalk Adapters that were easy to configure and monitor.

Adapter development commenced in 2002. At that stage the Adapters were provided free of charge on a trial basis before the project went commercial in June 2003.

The time the Adapters were available for free to users proved invaluable in stabilizing them for production purposes.

Proper planning and design within a BizTalk Solution is critical. If this is not performed by competent resources a project stands a huge risk of failing during development or not scaling properly within production.

Implementation expertise unfortunately takes years to develop. It became evident that experienced BizTalk Implementation Consultants were required to do the designs and implementations of BizTalk Solutions.

The company currently offers a variety of BizTalk Adapters and Consulting Services to the market.

### Structure

The Company is currently broken down into two separate companies:

- **Enabler Holdings** who is responsible for Product Development.
- **Enabler Business Consultants** who is responsible for providing consulting services around BizTalk Server implementations.

### Products

The following products are currently offered by the company:

- BizTalk Utilities
- BizTalk Utilities Adapter for Databases
- BizTalk Utilities Adapter for Messaging
- BizTalk Utilities Adapter for SAP
- BizTalk Utilities Legacy Adapter
- BizTalk Utilities SOA Accelerator

The BizTalk Utilities range of Adapters main aim is to drastically reduce the time and effort spent in integrating systems with BizTalk Server.

The Adapters can be downloaded and purchased from the TopXML website at [www.topxml.com/biztalkutilities](http://www.topxml.com/biztalkutilities).

The Adapters allows non-technical consultants to easily configure and monitor the Adapters.
